**AN ORDINANCE**—Supplementing and amending Ordinance No. 318 of 1921 entitled, "An Ordinance regulating the design, erection, and the use of building materials, systems, units and forms of construction; authorizing the Superintendent of the Bureau of Building Inspection to issue approvals and disapprovals of building materials, systems, units and forms of construction; extending the right to any manufacturer, agent or local representative to conduct tests to prove the strength and suitability of his building material, systems, units or form of construction for the purposes for which it is intended to be used; providing regulations for the conduct of tests and test standards for the strength and suitability of building materials, systems, units and forms of construction; all with a view to preventing danger to and loss of life or damage to property from unsafe or improper construction or design of buildings; and providing penalties for violations of the provisions, herein," approved July 13, 1921, by adding to Section 5 a new Paragraph (f) relating to "Rolled Structural Steel Piles."

Section 1. *Be it ordained and enacted by the City of Pittsburgh, in Council assembled, and it is hereby ordained and enacted by the authority of the same, That* Section 5 of Ordinance No. 318 of 1921 be supplemented and amended by the addition of a new paragraph as follows:

(f) 1. **ROLLED STRUCTURAL STEEL PILES:** Rolled structural steel piles shall conform as to material to the requirements of Section 4 **MATERIAL**, City of Pittsburgh, Steel Regulations, Series of 1925, Ordinance No. 341. Sections of such piles shall be of H form, with flange projection not exceeding

12 times the minimum thickness of metal in either web or flange and with total flange width at least 85 per cent of the depth of the section. No section shall have a thickness of metal less than 7/16 of an inch nor a depth in the direction of the web of less than 8 inches.

All rolled structural steel piles 30 feet or less in length shall be unspliced section. If splices are used in piles of greater length, such splices shall be made with the pile sections in full contact and the type of splice shall be such as will resist driving shock and maintain perfect alignment of the pile. A reduction of 5 per cent shall be made in the allowable load on the pile for each splice in excess of one.

Provisions for transferring the load into the piles shall be made by means of plates, caps or other devices consistent with the provisions of the regulations contained in Ordinances of the City of Pittsburgh covering stresses in materials used in structures.

Rolled structural steel piles shall not be used through cinder or ash fill, or other active rust inducing material, without adequate provision for the protection of the piles.

The compression stress in rolled structural steel piles shall not exceed 10,000 pounds per square inch of gross section when the soil furnishes continuous adequate lateral support. When such piles are driven through silts or soft clays, or are otherwise not supported against lateral movement throughout their full length, the direct axial stress shall be reduced to 66-2/3 per cent of the stresses prescribed in subparagraph (b) Compression, Section 6 **ALLOWABLE STRESSES**, City of Pittsburgh, Steel Regulations, Series of 1925, Ordinance No. 341. For determining the allowable stress, such piles shall be considered as having a length 1-1/2 times the length of the portion of the pile within the soft material, with the full length of the pile as the limit. Splices occurring in unsupported lengths of piles shall develop full section strength.

**II. ROLLED STRUCTURAL STEEL PILES DRIVEN TO BED ROCK:** When driven to refusal with a steam hammer of approved adequate weight and

type to full end bearing on bed rock, rolled structural steel piles shall have the following maximum allowable capacities:

| Nominal Size of Piles in Inches (Average Side to Nearest Inch) | Maximum Allowable Capacity in Tons |
|--|------------------------------------|
| 8  | 40                                 |
| 10   | 45                                 |
| 12   | 55                                 |
| 14 and over  | 65                                 |

The minimum spacing of such piles shall be not less than 24 inches nor less than twice the maximum dimension of the side of the pile. Where rolled structural steel piles are intended to found on rock adequate boring data shall accompany the application for permits, to determine bed rock evaluations. Such boring data shall be at least equivalent to those required by "Soil Tests" sub-paragraph (c) Soil Bearing Capacity, (7) Safe Working Stresses, Section 5 CALCULATIONS FOR SAFE-CARRYING CAPACITY of this Ordinance.

**III. ROLLED STRUCTURAL STEEL PILES DRIVEN TO MATERIALS OTHER THAN BED ROCK:** When driven to materials other than bed rock, the allowable load on rolled structural steel piles shall be determined as prescribed by the following formula:

$$P \text{ equals } ( 2WH ) \\ S \text{ plus } 1$$

$$P \text{ equals } ( 2WH ) \\ S \text{ plus } 1-10$$

In which:

P—Safe sustaining power in case drop hammer is used.

P'—Safe sustaining power in case steam hammer is used.

H—Height of drop in feet.

S—The average penetration of the pile in inches under the last five blows.

W—Weight of the hammer in tons.

Or by pile loading tests as follows:

Tests shall be made with 150% of the proposed load and shall be considered unsatisfactory and the results unacceptable if, after standing 24 hours without settlement, the total net settlement after deducting rebound is more than 0.01" per ton of total test load.

with the limitation that no such pile shall have an allowable bearing capacity exceeding 30 tons unless it shall have been driven more than 40 feet into the ground, or unless it shall have been driven to refusal in hard pan, or in gravel and boulder formation, which is not underlain by a softer stratum, in either of which cases the maximum load per pile may be 40 tons. In no case shall the spacing of the piles be such that the supporting strata shall be loaded more than is specified in "Presumptive Capacities" in sub-paragraph (c) Soil Bearing Capacity, (7) Safe Working Stresses, Section 5 CALCULATIONS FOR SAFE-CARRYING CAPACITY of this Ordinance, except that, if the surface of the natural material on which the load is to be applied is at a depth greater than 10 feet below the level of the lowest adjacent curb, then these unit loads may, in the discretion of the Superintendent of Building Inspection, be increased by 100 pounds for each foot of depth in excess of 10 feet, but the maximum increase allowable for increased depth shall be 50 per cent of the allowable presumptive bearing capacity for the soil upon which the foundation is to rest.

Section 2. That any ordinance or part of ordinance, conflicting with the provisions of this ordinance, be and the same is hereby repealed, so far as the same affects this ordinance.

## No. 4

Whereas, The Fisher Scientific Company of Pittsburgh has submitted plans to the Division of Public Utilities in the Department of Public Works, City of Pittsburgh, for the erection of a six-story and basement addition to their plant on Forbes and Watson Streets; and

Whereas, Ordinance No. 405 of 1924, providing "General Building Regulations," requires that all footing projections beyond the property lines shall be at least five feet, placed at fifteen feet below the established grade of the street; and

Whereas, The area under the sidewalk at the point at which said footings are to be placed consists of hard shale and rock, requiring extensive blasting

at a great cost to the Company and serious disturbance to the immediate neighborhood; and

Whereas, In order to lessen the cost to the Company and probable disturbance to the neighborhood, the said Fisher Scientific Company requests permission, at its own cost and expense, to maintain and use reinforced concrete footing under the south sidewalk of Watson Street and the north sidewalk of Forbes Street, projecting 3 feet 6 inches beyond the property lines of Watson Street and Forbes Street, said footer projections to be placed at a minimum depth of 10.17 feet below the grade elevation on Watson Street and a depth of 15.38 feet on Forbes Street; and

Whereas, It is understood and agreed to by said Company that it accepts the requirements set forth in Section 9, Clause (7) of the Ordinance of 1925 as follows:

"The City of Pittsburgh, without liability, reserves the right to cause the removal of any such projections after having given Thirty Days notice to the proper executive officers pursuant to Resolution or Ordinance of Council to the Owner or Lessee or any heirs or assigns of any such Owner or Lessee;"

and further agrees to fulfill all the requirements set forth in said section of the ordinance of 1924 relative to repairs of streets, sidewalks, sewers, water lines and other sub-surface structures, saving the City from all liability; Therefore Be It

RESOLVED, That the request as set forth above shall be and is hereby granted; provided, further, that said Company shall submit to the Director of the Department of Public Works, complete plans in triplicate, showing location and details for the construction of said footer projections, said plans, to be subject to the approval and supervision of the director of the Department of Public Works.

## No. 5

Whereas, Under the authority of Ordinance No. 211, approved by the Mayor August 7, 1935, the City of Pittsburgh entered into a contract with Walter S. Rae for repairs to Columbus Avenue Bridge, under contract known as "Columbus Avenue Bridge over P. J. R. R., Structural and Concrete Repairs to Warner Street Span and Approach," and

Whereas, in order to complete the work in a satisfactory manner, it was necessary for the Contractor to place an amount of asphaltic concrete surfacing greatly in excess of the amount indicated on the plans, and

Whereas, the excess asphaltic concrete surfacing is equivalent to 177 square yards of the usual depth of 2½ inches, and

Whereas, the contract price per square yard of asphaltic concrete surfacing with an assumed depth of 2½ inches is \$1.75, at which unit price the compensation for the extra work would amount to Three Hundred and Nine Dollars and Seventy-five Cents (\$309.75), and

Whereas, the Contractor performed this work in a satisfactory manner; Now, therefore, be it

Resolved, That the Mayor be and he is hereby authorized and directed to issue and the City Controller to countersign a warrant in favor of Walter S. Rae, in the amount of Three Hundred and Nine Dollars and Seventy-five Cents (\$309.75), in payment for the extra work done and to charge same to Code Account No. 1570.

## No. 23

Whereas, The City of Pittsburgh and the Pittsburgh District in three surrounding states have suffered complete paralysis from the effects of the greatest flood in recorded history, with appalling loss of human life and property and damage losses running into hundreds of millions of dollars.

Whereas, for a period of twenty-five years, the Flood Commission of Pittsburgh, created following the flood of 1907, the engineers of the United States Army, and the engineers of the State of Pennsylvania have made studies and reports on a proposed system of storage reservoirs to control floods, regulate navigation, protect water supplies, and aid in sanitary disposal of waste materials; said studies having been made with funds contributed by the Federal and State governments, by the City of Pittsburgh, by Allegheny County, and by large industries and private individual property owners.

Whereas, As a result of this quarter century study of the flood problem for this region, a series of proposed reservoirs has been designed which will greatly control floods and prevent such disasters as that now prostrating us, which reservoir project is ready for work to start at once, and of which one reservoir is now under construction on the Tygart river in the Monongahela valley at a cost of \$16,000,000, and 13 remain to be approved for construction at a total cost of about \$70,000,000.

Whereas, Through the efforts of the Tri-State Authority, a volunteer organization of the mayors and burgesses of some 230 cities and towns in Western Pennsylvania, Ohio, and West Virginia, with headquarters in Pittsburgh, organized in August, 1933, for the express purpose of concentrating all of the political and civic authority of this entire region upon the Federal government to procure PWA funds for the completion of the reservoir system, resulting in allocation of funds for the Tygart reservoir, has announced that a mass conference of officials of the above mentioned 230 communities will be called in Pittsburgh as soon as conditions permit, for the purpose of more determined effort to convince Federal authorities of the necessity for immediate start of construction upon the proposed system of reservoirs.

Be It Resolved, That the City of Pittsburgh, through its Council and Mayor, hereby offers to cooperate fully with the effort being made by Tri-State Authority, the Flood Commission of Pittsburgh, and other organizations to procure immediate authorization for construction of the proposed system of 13 additional reservoirs with Federal funds at a total cost of \$70,000,000 for the social benefit and protection of life and property to the more than 4,000,000 people dwelling within the watersheds of the Monongahela, Allegheny and upper Ohio rivers., and

Be It Further Resolved, That the copies of this resolution be forwarded immediately to Federal Public Works Administrator, Harold L. Ickes, to General Edward M. Markham, chief of U. S. Engineers, to the United States Senators of Pennsylvania, to the Congressmen of Allegheny County, to the Governor of the State of Pennsylvania, and to the senators and representatives in the Pennsylvania Legislature, with urgent recommendation that they exert all their influence to procure immediate allocation of funds to start work upon the system of reservoirs and to procure passage in this Congress of the Omnibus Flood Control bill (H. R. 8455) which authorizes the adoption of these reservoirs as Federal projects.

Whereas, The Public Service Commission of the Commonwealth of Pennsylvania, on August 4, 1936, after full and complete investigation, granted to the Brentwood Motor Coach Company a Certificate of Public Convenience, authorizing the said Brentwood Motor Coach Company to carry passengers between the Borough of Library and the City of Pittsburgh by way of South Park and Saw Mill Run Boulevard; and

Whereas, The granting of said Certificate of Public Convenience by the Public Service Commission is prima facie evidence of the need for said service; and

Whereas, The Pittsburgh Motor Coach Company, while protesting the granting of said Certificate of Public Convenience, has failed to render adequate and sufficient service in said district; and

Whereas, The said district is not adequately served by the Pittsburgh Railways Company; and

Whereas, The Pittsburgh Motor Coach Company has taken an appeal to the Superior Court, contesting the right of the Public Service Commission to grant said Certificate of Public Convenience; Now, Therefore, be it

Resolved, That the City Solicitor be, and he is hereby, authorized and directed to petition the Superior Court to permit the City of Pittsburgh to intervene as an appellee with the Brentwood Motor Coach Company and the Public Service Commission in said appeal, and to proceed with same until finally disposed of; And, Be it further

Resolved, That a copy of this resolution be forwarded to the Pittsburgh Motor Coach Company.

Whereas, A Writ of Peremptory Mandamus has issue at No. 2249, July term, 1936, in the Common Pleas Court of Allegheny County, wherein Florence Gretton, as plaintiff and the City of Pittsburgh, W. N. McNair, Mayor of the City of Pittsburgh; Leslie M. Johnston, Director of the Department of Public Works of the City of Pittsburgh; James P. Kerr, Controller of the City of Pittsburgh; James P. Kirk, Treasurer of the City of Pittsburgh; and J. W. Ullem, President, C. L. Erinton, and Conrad Checco, Composing the Civil Service of the City of Pittsburgh, and

Whereas, The position of Florence Gretton as General Supervisor (Female) Bureau of Recreation, Department of Public Works of the City of Pittsburgh is created and provided for the current year by ordinances of the City of Pittsburgh, and

Whereas, A removal or suspension from said position was made by the Director of the Department of Public Works under the allegation that there was no work for said Supervisor, when in point of fact it appears by the record of said case that the duties of said office were being performed by others, and

Whereas, Regardless of the allegations of the Director of the Department of Public Works, contained in the pleadings in this case, it is obvious that the case involves a decision upon the question as to the right of a Department to eliminate positions created by ordinance. Now, be it

Resolved, That the City Solicitor be and he is hereby called upon, should an appeal in such case be taken to the Superior Court, to fully present to the Court the right of this Council, as set out in the Acts of Assembly, solely to prescribe the positions and number of the employees of the various departments.

## No. 156

Whereas, The City of Pittsburgh by Ordinance 230 approved March 26, 1927, raised the then existing grade of Reedsdale street on the North Side of Pittsburgh, Pennsylvania, about 3 feet, 8 inches, at and east of the intersection of Scotland avenue with the said Reedsdale street, and

Whereas, The City of Pittsburgh by Ordinance 25 approved January 17, 1929, and before any actual raising pursuant to Ordinance 230 aforesaid had been made, lowered the grade of the said Reedsdale street from that established by Ordinance 230 aforesaid about 2 feet, 3 inches, and

Whereas, The City of Pittsburgh did on October 31, 1928, through its Director of Public Works, notify the owners of property on Reedsdale street of the City's intention to raise the said street as provided in Ordinance 230 aforesaid, and

Whereas, said notification advised the said owners that those desiring to raise their buildings could obtain the correct grade of the said Reedsdale street in front of their property at the Bureau of Engineering, Room No. 433 City County Building, and

Whereas, The City of Pittsburgh, through its director of Public Works, did on May 13, 1929, send another notice to the owners of property on Reedsdale street that unless said owners would take the necessary precautions to protect their buildings against the filling material which would be placed on the Street in front of the same that, they, the owners would be responsible for any damage that may occur thereby, and

Whereas, The said notice of May 13, 1929, referred to the former letter of October 31, 1928, and again notified the said owners that the correct grade could be seen in the Bureau of Engineering, Room No. 433 City County Building, and

Whereas, Said notice of May 13, 1929, contained no notice of Ordinance 25 approved January 17, 1929, and

Whereas, Certain owners of property on Reedsdale street, pursuant to said notices, entered into contracts with Hering Bros. House Moving Company to have their buildings raised to conform to the new grade, and

Whereas, The said Hering Bros. House Moving Company did, pursuant to said notices, consult the Bureau of Engineering of the City of Pittsburgh, at 433 City County Building, for the purpose of obtaining the correct grade of the said Reedsdale street in front of the various buildings, and

Whereas, the said Bureau of Engineering of the City of Pittsburgh did erroneously advise the said Hering Bros. House Moving Company by giving to the said Hering Bros. House Moving Company the grade or grades established by Ordinance 230 aforesaid instead of giving the grade or grades established by Ordinance 25 aforesaid, and

Whereas, in consequence of the erroneous advice given by the Bureau of Engineering of the City of Pittsburgh to Hering Bros. House Moving Company, the respective buildings of the following owners have been raised approximately 2 feet, 3 inches, too high:

Lawrence Varion and Frances Varion, his wife, 620 Reedsdale street.

Ellen Calnan, now deceased, 623 Reedsdale street.

Frank Caputo, 622 Reedsdale street.

Louis Colombo, 618 Reedsdale street.

A. Alberta McFarland, 629 Reedsdale street, and

William T. McFarland, Charles, A. McFarland, A. Alberta McFarland, Estate of Alice E. Logan, Deceased, 627 Reedsdale street, and

Whereas, The fair cost of labor and materials (exclusive of any profits thereon, overhead or extraordinary expenses) required to lower the said buildings approximately 2 feet, 3 inches, to conform to the present grade, being that established by Ordinance 25 aforesaid, is as follows:

Lawrence Varion and Frances

Varion, his wife.....\$1,500.00

Estate of Ellen Calnan..... 967.00

Frank Caputo ..... 1,300.00

Louis Colombo ..... 1,014.00

A. Alberta McFarland..... 967.00  
 William T. McFarland, Charles  
 A. McFarland, A. Alberta  
 McFarland, Estate of Alice  
 E. Logan, Deceased..... 967.00  
 and

Whereas, it has been estimated by competent experts that the fair market cost of lowering the buildings of the aforesaid owners approximately 2 feet, 3 inches, would be substantially double the amounts above set forth for each case, and

Whereas, suits have been brought by each of the aforesaid owners against Hering Bros. House Moving Company to recover the said fair cost of lowering their respective buildings as aforesaid. and

Whereas, Hering Bros. House Moving Company in each suit has caused a Writ of Scire Facias to be issued and served upon the City of Pittsburgh, naming it as additional defendant, and

Whereas, each of the said owners has agreed to accept in full settlement and satisfaction of claims the amount set opposite his name above; Now, Therefore, be it

Resolved, That the Mayor be and he is hereby authorized and directed to issue and the City Controller to countersign warrants in favor of the following named persons, in the following amounts, and charge the same to Code Account No. 42.

Lawrence Varion and Frances  
 Varion, his wife.....\$1,500.00

## No. 168

Whereas, The Pittsburgh Motor Coach Company has a practical monopoly of the business of transporting passengers as a common carrier over scheduled routes by motor vehicle in the City of Pittsburgh; and,

Whereas, The Pittsburgh Railways Company owns all the capital stock of the Pittsburgh Motor Coach Company; and,

Whereas, The policy of the two companies has been for the Motor Coach Company to charge a Twenty-five (25c) Cent fare in the belief that service for this fare would be noncompetitive with the Railways Company; and,

Whereas, There is need for a more extensive bus service in the City for a lower fare than Twenty-five (25c) Cents; and,

Whereas, It is generally agreed that the policy of the Pittsburgh Motor Coach Company of charging a Twenty-five (25c) Cent fare has been a mistake, has been injurious to the interests both of the Railways Company and the Pittsburgh Motor Coach Company, and has resulted in depriving the public of bus service for a reasonable fare; Now, Therefore, be it

Resolved, That the policy of the City of Pittsburgh is to provide adequate motor bus transportation at a

reasonable fare less than Twenty-five (25c) Cents within the City, and that the City Solicitor be directed to file a copy of this Resolution with the Public Service Commission in the complaints of the City now being heard by the Commission against the Pittsburgh Motor Coach Company.
